EXPERIENCE

Full-stack Software Engineer, Instana January 2025 – Present
IBM Deutschland Research & Development *Stuttgart, Germany*

- Co-authored two patents in AI-driven root cause analysis and failure localization using LLMs and probabilistic modeling, with one selected for publication
- Developed Java services for telemetry ingestion, infrastructure graph construction, and querying, improving data accuracy and throughput across large-scale observability pipelines
- Analyzed production telemetry, workload patterns, and service bottlenecks to recommend and validate scaling, resource allocation, and configuration changes for Kubernetes-based services
- Partnered with SRE and engineering teams to investigate and resolve production issues across Kubernetes, Kafka, Elasticsearch, Cassandra, networking, and internal metric-processing systems
- Improved application performance by up to 90% in large-scale environments through paginated query strategies and request-handling optimizations, eliminating UI freezes and memory bottlenecks
- Designed and shipped customer-facing observability features in React, including host availability dashboards, Cassandra cluster filtering, and advanced dashboard customization

Full-stack Software Engineer, Instana May 2022 – January 2025
IBM Canada Ltd. *Toronto, Canada*

- Served as a Front-end Lead, overseeing task creation for team members, mentoring new hires, and representing the team at UI community meetings
- Led full-stack development and technical planning of key features using React and Java, including the successful integration of Salesforce for external notifications in Instana
- Drove the UI/UX design and implemented the React components for one of Instana's first AI features, facilitating root cause analysis of incidents and enhancing operational insights
- Partnered with designers and product managers to convert high-fidelity designs into reusable UI components for Instana's SaaS observability platform
- Delivered comprehensive support to key customers by effectively resolving complex issues and bugs across Instana's Java backend and React-based UI/UX, significantly boosting customer satisfaction and ensuring service reliability

Full-stack Developer Sep. 2021 – Jan. 2022
Shomigo *Toronto, Canada*

- Co-Lead Developer for the Shopify vendor app, employing Node.js and React, driving key enhancements in functionality and user experience
- Managed a REST API facilitating communication between Mongo & PostgreSQL databases and the Shopify API
- Collaborated directly with vendors to create and implement analytics for tracking customer activity on storefront pages, enhancing insights into user behavior

EDUCATION

Toronto Metropolitan University Toronto, ON
Bachelor of Engineering, Computer Engineering *Sept. 2016 – May 2022*

COMMUNITY ENGAGEMENT

IBM Next May 2023 – January 2025

- Lead a team of 10+ volunteers coordinating IBM office events for 50+ attendees, managing planning, budgets, and execution

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Java, Python
Frontend: React, Figma
Backend: Dropwizard, Node.js, Flask, REST APIs, JUnit, Gradle
Infrastructure & Data: Kubernetes, OpenShift, Docker, Kafka, Elasticsearch, Cassandra, Prometheus, OpenTelemtry
CI/CD & Developer Tools: Jenkins, Git, CI/CD pipelines
